

A) AquaClean Wash Water filtration system. Includes 100 micron bag filtration, 250 gallon storage capacity, 10 micron circulation loop with UV sterilization and bromide injection, 5 micron post polish filtration. Optional Multimedia Cartridge to remove trace oils and metals to non detect levels.

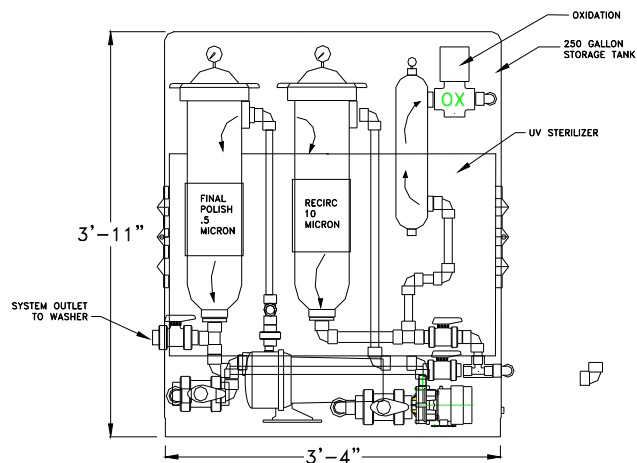

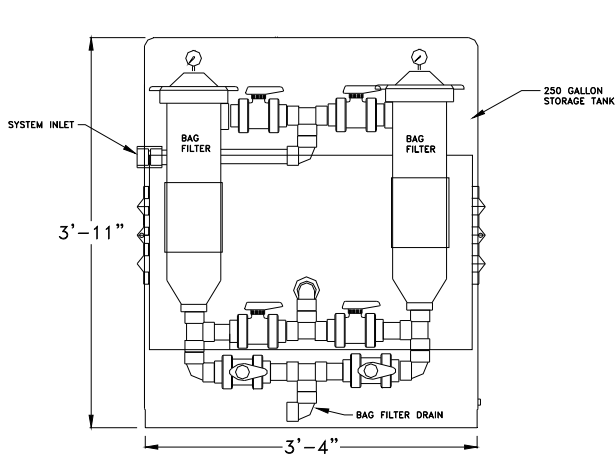

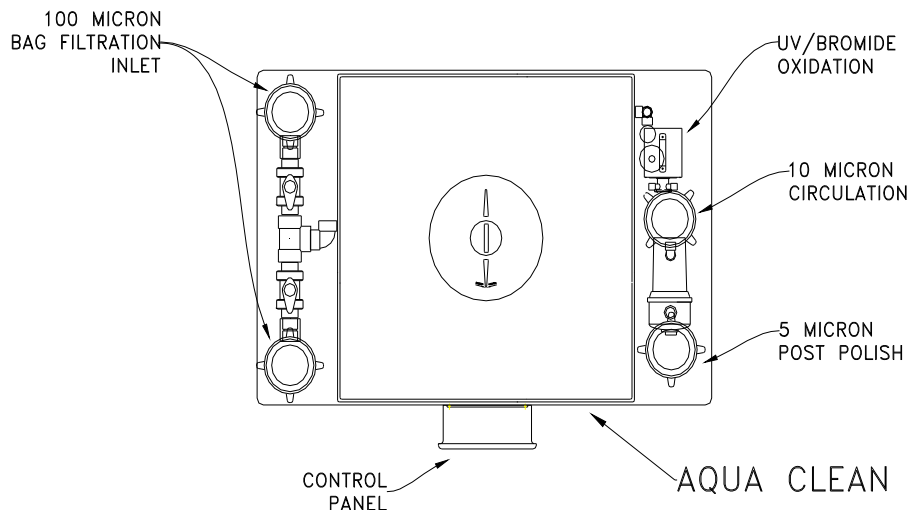

B) 500 Gallon Cone Bottom settling tank to remove large solids, free oil accumulation. System includes bag sludge removal system that evacuates accumulated solids into a 120" bag filter for easy removal of solids.

AquaClean

**Wash Water Recycling
designed with simplicity for
ease of use operation**

AquaClean

- 20 GPM WASH WATER RECYCLING @ 40 PSI FEED OUTPUT
- LOGICAL STEP DOWN FILTRATION FROM 100 MICRON TO 5 MICRON FINAL POLISH.
- UV STERILIZATION AND BROMIDE INJECTION ON A CONTINUOUS CIRCULATION LOOP WITH 10 MICRON FILTRATION.
- 250 GALLON STORAGE CAPACITY OF FILTERED WATER
- 110 VOLT 15 AMP POWER SUPPLY
- ALUMINUM AND UV INHIBITED POLY CONSTRUCTION
- OPTIONAL MULTI-MEDIA FILTER DESIGNED TO REMOVE TRACE OILS AND METALS TO NON DETECT LEVEL
